

Power Density

- From 11 Watts per ft² to 18 Watts per ft², depending on the final floor covering.
- Voltage 120 or 240 VAC

Safety

- Manufactured in compliance with IEC (International Electrical Committee) safety specifications
- Tested 100% Safe.
- Resistant to fire, and is self-extinguishing.
- In accordance with Article 424 of ANSI/NFPA 70, "National Electrical Code" (NEC)

GFCI Protection

- Heating elements must be connected to a grounded power supply via a GFCI (Ground fault circuit interrupter) protected outlet or thermostat.

Control

- Room or floor sensing or a combination of both via a 7-day fully programmable GFCI protected thermostat.
