

# KlimaGrip Non Slip Insulation Pad

Floormat.com's KlimaGrip™ is the ultimate solution to prevent any unwanted movement or slipping of your area rug and RugHeat heating panel on any type of flooring. Crafted from two durable non-woven polyester fabrics, permanently needle-punched together and coated with a specially formulated water-based pressure sensitive dry adhesive on both sides, meaning this pad will not rot, crumble, or dry out. It can be used on any flooring surface. The revolutionary clean-lift, water-based adhesive covers both sides of the underlay, ensuring a skid-proof grip on the rug backing, RugHeat heating panel, and the carpet or floor. No more worries about movement or buckling. Plus, the adhesive is completely safe for all types of carpeting and floor finishes. The under rug mat also provides cushioning to prevent fiber damage and allows continuous airflow to prevent moisture and mildew buildup, all while being odorless.

- KlimaGrip™ provides thermal insulation between a hard floor and the heating panel
- Improves your Rugbuddy performance
- Available in all Rugbuddy sizes
- The item marked "1" is the KlimaGrip™ mat
- The item marked "2" is the [RugBuddy Under Rug Heating Panel](#)
