

Melt Step Snow Melting Mat

The Melt Step heated mat is the latest in snow melting mat technology. Unlike other snow melting mats, the MeltStep can be used indoors as well as outdoors. Its unique reversible design allows you to flip the mat to whichever side your outlet is located. This 3' X 5' mat will reach outdoor temperatures of 70 degrees and inside temperatures of 100 degrees. All of the heating and electrical components are UL Listed.

- Raised square design has a tread height of 1/8". Allowing water to channel out of the mat, keeping the walking surface dry.
- The mat weighs only 31.25 lbs.
- Voltage: 120v.
- Wattage: 385 watts.
- Engineered for up to four mats to be connected together.
- Mats can be ordered with one connector or two connectors.
- Great for mud rooms
- Designed to be left on continuously
