

# RugBuddy Under Rug Heating Panel

A unique, energy-efficient electric space heater for under area rugs. Keep warm in proven solution. RugBuddy is great for the elderly and even in dog and cat beds.

We recommend our [KlimaGrip Non Slip Insulation Pad](#) under your RugBuddy to reduce slipping and to reflect heat away from the floor.

There is also an optional [Programmable Outlet Thermostat](#) that is available to set the temperature of the RugBuddy to a specific temperature, while also allowing the user to program when they would like the RugBuddy to be turned on and off.

- Heats quickly, maximum temperature reached within 15 minutes of being turned on
- Maximum temperature of 95-110°F
- Only heat rooms in use
- Lower your thermostat
- No risk of fire
- No risk of shock
- No dust circulation
- No electromagnetic radiation (EMR)
- Sealed unit, may be cleaned with a damp sponge.
- 3' X 5' RugBuddy uses 170 watts
- 5' X 7' RugBuddy uses 365 watts

## RugBuddy Turns Carpets & Rugs into Heated Floors

Like an electric blanket for your floor, RugBuddy is the only portable heating system in the world approved for use under area rugs. Rug Buddy is an innovative heating system that turns rugs into "invisible" space heaters and lets you stay warm and keep your sense of style.

**RugBuddy can be used to supplement heat in chilly rooms, or specific areas in a room off a single electrical circuit or thermostat. Even different areas within one room, such as a desk and sitting area, can be heated from a single plug or thermostat.**

RugBuddy is the attractive solution for warming cold spots in any room of the home or office. You simply place the heating mat under your area rug and plug it in. RugBuddy is guaranteed safe no matter what type of floor covering is under your area rug (stone, tile, wood, laminate, vinyl, and/or carpet).

Instantly eliminate those cold spots in your home with this versatile, high-tech, portable electric radiant heating blanket instead of space heaters.

Perfect on top of existing hard surface flooring that feels cold or over already installed carpets in your bedroom or living room to add that extraordinary on-demand heating comfort right at your
